***The Home of Good Directories***

***The City Directory*** has become a universal necessity in looking up new prospects, in purchasing supplies, and in marketing products. Our experience of seventy years—our reputation for accuracy, our large force of experienced help and our complete equipment for the work, all guarantee the best in directory compilation. ***Put—"We are listed in the Directory"*** in all your advertising copy. Don't forget that directory advertising supplements and rounds out all your other advertising by giving the most explicit directions how to find you. Addresses are often forgotten or mislaid though the name is remembered. The firm that is properly registered in all branches of its industry is wise. ***Addressing the right people*** in the search for new business means a saving of Time, Postage, Labor, Guess Work, Stationery and results in more profits to you. You want your mailing lists accurate,—That's the kind we make. Ask us to tell you about this branch of our business.

Ask Sampson & Murdock Co. about the City Directory, the book of many uses.

# STREET DIRECTORY

AND GUIDE TO

## SUMMER RESIDENCES

COPYRIGHT, 1916, SAMPSON & MURDOCK CO., BOSTON, MASS.

*(See also List of Summer Residents)*

Giving the location of the Streets, Places, Parks, Squares, etc., and showing what other streets and places run from them, or across them, with the number at which they intersect

From this list, the location of any number on a street, or the location of any public building, can be easily ascertained; as, for instance, wishing to know at what part of Broadway No. 220 is located, you look at Broadway, and find that Gould Street runs from 202, and Park Street from 226, showing that 220 would come on the left, between Gould and Park Streets

When a street crosses another, numbers (or ciphers) are given on both sides; but when it begins or ends at that street, the number is given only on the side at which it intersects. Ciphers are used where no numbers exist

*Indicates streets accepted. **Indicates part of street accepted

### FIRE DEPARTMENT SIGNALS

First Alarm—Number of Box repeated four times
Second Alarm—22 (.. ..) struck after first alarm
Still Alarm—2 (..) strokes call Chemical Co.
Practice—1 (.) stroke preceding an alarm from either box indicates that the alarm is for practice
Re-call—3 (...) strokes after either alarm indicate that the fire is under control, and relieves the companies held in reserve

### SPECIAL SIGNALS

Time and Test of Alarm—1 (.) stroke at 12 M., 6 P.M. and 9 P.M.

Police Special—121 (. .. .) repeated calls all Policemen not on duty to report at Police Station

Military Special—9 (. . . . . .) strokes repeated calls all Militia Men to their Armories

### GENERAL INFORMATION

Keys of the Fire Alarm Boxes are placed with the residents in the immediate vicinity of the several boxes, also with all the policemen, and in several locations a Key is hanging on the side of the Box. Citizens will please inform themselves where the Keys are kept—signs giving the required information being placed on the Box

Key holders upon positive information of a fire in their immediate vicinity (nearer to that box than any other), may unlock the box, and IF THE SMALL GONG IN THE BOX IS NOT STRIKING, may pull the hook down ONCE AND LET GO. If the small gong in the box does not immediately respond by striking the number of the box and the fire alarm bells are not striking, do not hold down the hook or pull it a second time, but proceed promptly to pull the next nearest box, as the failure of the box to respond on either the gong in the box or on the alarm bells would indicate something wrong with that box or circuit, with which the adjacent boxes would not be affected, as they are arranged on separate circuits

Key holders are instructed that a box must never be pulled for a fire seen at a distance, or their key intrusted to boys or irresponsible persons

Persons giving an alarm are requested to remain at the box until the arrival of apparatus and then direct them to the locality of the fire

One stroke on the alarm bells, or two strokes, with an interval between them, indicates that the alarm is being tested

Two strokes preceding the pulling of any box will indicate that the box is pulled by the Chief Engineer to practice the department

The Chief Engineer will use the fire alarm to transmit his orders to the whole department or any detail thereof

The above Details, Signals, etc., will be observed as a General Order and will supersede all others on and after April 1st, 1907
